220 Watt Photovoltaic Module

BP 3220

The BP 3220 is an advanced polycrystalline 220W solar module that incorporates antireflective coated cells and glass to generate more energy (more kWh per kWp) in your installation.
This module has undergone the most rigorous testing to ensure reliable long term performance and is certified to comply with the latest safety standards (IEC61730 & UL1703).
Six bypass diodes mounted on our IntegraBus™ circuit board and laminated in the module provide effective protection of the solar cells from overheating when shaded and ensure long term reliability.
All interconnections are made using lead free soldering making these modules even friendlier with the environment.
